

VW T2 BUS COMBI Blue & White

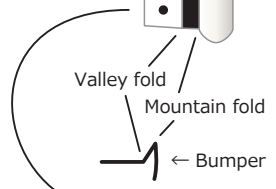

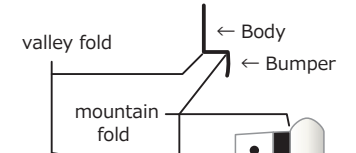

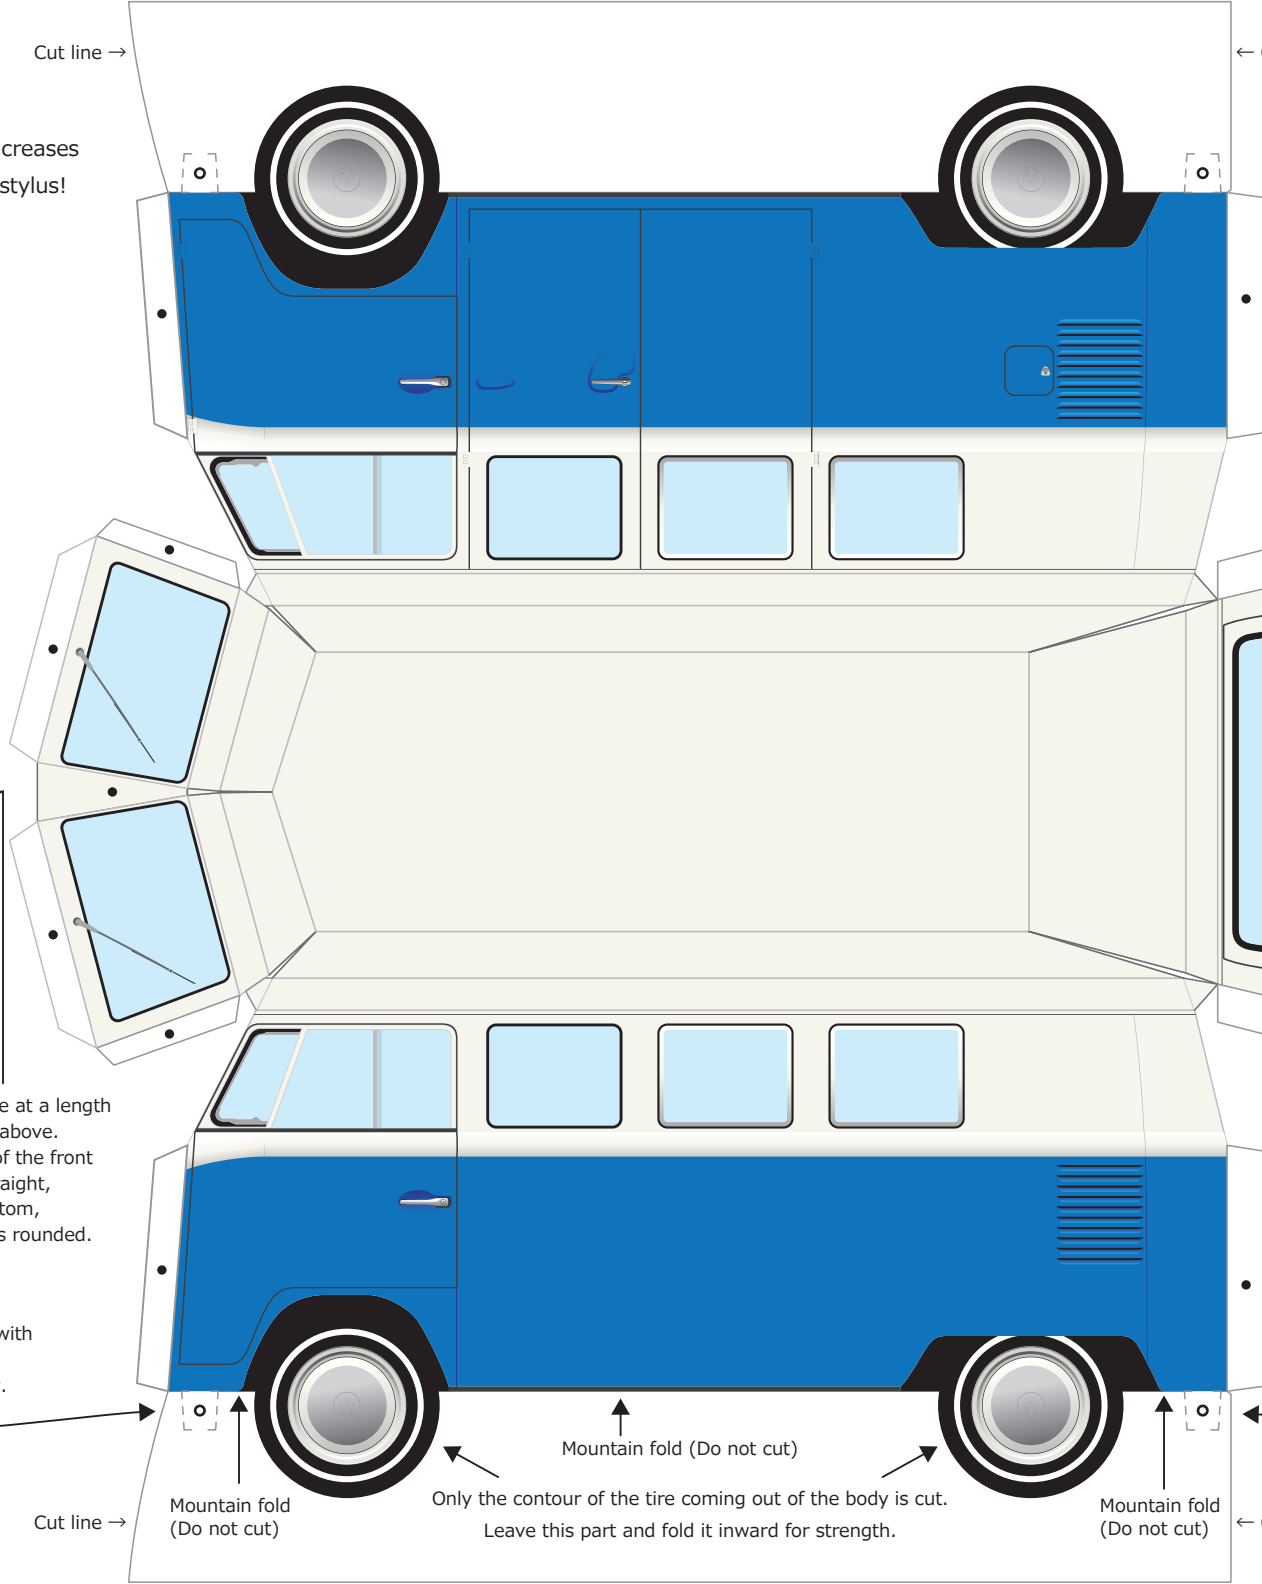

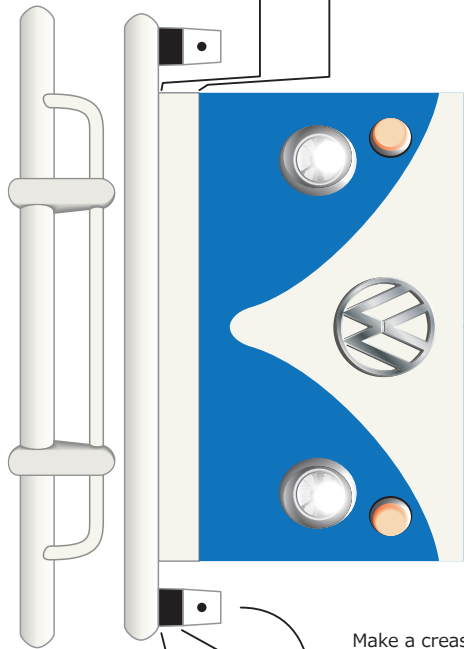

You can make it beautifully by making creases on the valley side of all creases with a stylus!

- Glued surface

Fold and stack

Mountain fold Valley fold

Make a crease at a length of about 1/3 above. The bottom of the front window is straight, while the bottom, the bumper is rounded.

Apply glue to the surface with the black dots, and stick it on the bottom of the body.

Apply glue to the surface with the black dots, and stick it on the bottom of the body.

If you make a crease on the back side and fold it, the roundness of the bumper can be reproduced (front and rear)

Cut line →

Mountain fold (Do not cut)

Only the contour of the tire coming out of the body is cut. Leave this part and fold it inward for strength.
